# 1. Introduction

## 1.1 Purpose

This document is detailed in the APIs inquiry for vehicle's Insurance, their resources and their request/response parameters. The details of each parameter field like its type are also described, so that the clients of the API are aware of the expected inputs and the response provided by the API with samples of request and response.

## 1.2 Scope

The document mainly focuses on APIs available for vehicles insurance information and the parameters required invoking these web services.

## 1.3 Definitions

| Acronym or Abbreviation | Definition                     |
|-------------------------|--------------------------------|
| NIC                     | National Information Center    |
| NIN                     | National Identification Number |
| OTP                     | One Time Password              |
| URL                     | Uniform Resource Locator       |
| HTTP                    | Hyper Text Transfer Protocol   |
| MOI                     | Ministry of Interior           |

## 2. Authentication

Please refer to the *Profile Management Integration Guide* or the *Integrators Integration Guide* in case you are an integrator.

## 3. Vehicle Insurance

The main function of this API is designed for getting Insurance details to vehicle from Tamm system. This API is in three different forms, either from vehicle plate number or vehicle sequence number, custom card:

### 3.1 Retrieve vehicle Insurance using vehicle plate

The main function of this API is to validate vehicles by passing plate information.

#### URL

| Name         | Example                                      |
|--------------|----------------------------------------------|
| URL          | {{baseUrl}}/api/v1/inquiry/vehicle-insurance |
| HTTP Method  | POST                                         |
| Content-Type | application/json                             |

#### Service Input

| Name                 | Type                | Description                                     | Example                     | Required         |
|----------------------|---------------------|-------------------------------------------------|-----------------------------|------------------|
| X-Integrator-User-Id | Long Request Header | <a href="#">Ref table index 4.7</a>             | X-Integrator-User-Id=7124   | Yes              |
| searchType           | Integer             | <a href="#">Ref table index 4.5 Search Type</a> | search-Type=0,1,2           | Yes              |
| sequenceNumber       | Integer             | Vehicle sequence number                         | sequenceNumber: "821542710" | Conditional when |

|            |                                                                                                                            |                                                      |                                                                                                             |                                |
|------------|----------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|--------------------------------|
|            |                                                                                                                            |                                                      |                                                                                                             | Search Type 1                  |
| customCard | Integer                                                                                                                    | Vehicle custom card                                  | customCard: "1014260480"                                                                                    | Conditional when Search Type 2 |
| plateDto   | JSON Object<br>{<br>"text1": "ب",<br>"text2": "ب",<br>"text3": "ب",<br>"number": 2222,<br>"type": {<br>"code": 1<br>}<br>} | Vehicle plate information<br><br>Ref table index 4.3 | {<br>"text1": "ب",<br>"text2": "ب",<br>"text3": "ب",<br>"number": 2222,<br>"type": {<br>"code": 1<br>}<br>} | Conditional when Search Type 0 |

### Example: vehicle insurance using plate number

|               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Request       | <pre>{   "searchType": 0,   "plate": {     "text1": "د",     "text2": "ع",     "text3": "د",     "number": "1946",     "type": {       "code": 1,       "nameAr": "خاص",       "nameEn": "Private Car"     }   } }</pre>                                                                                                                                                                                                                                                                                                                                                                      |

## 4.4 Plate Types

| Plate Code | English Name      | Arabic Name |
|------------|-------------------|-------------|
| 1          | Private Car       | خاص         |
| 2          | Public Transport  | نقل عام     |
| 3          | Private Transport | نقل خاص     |
| 10         | Morotbike         | دراجة آلية  |

## 4.5 Search Type

| Search Type | Name               |
|-------------|--------------------|
| 0           | Plate number       |
| 1           | Sequence Number    |
| 2           | <b>Custom Card</b> |

## 4.6 Business validation errors and messages.

This is a set of validations, not all of them and we recommend it does not depend on the message description since it might change in future. But the list is only for consideration to be familiar with the validation that exists in the system.

| Validation                                     | Operation                                | Error detail                                                                                                                                                                                                                                                                  |
|------------------------------------------------|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 4.7 FAQs

| Key (What does it mean?)                                             | Explanation                                                                                                                                                                                                                                |
|----------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| X-Integrator-User-Id                                                 | X-Integrator-User-ID is a required header that carries the user identifier of the ELM client. This value is utilized by backend services during the internal validation process to ensure request authenticity and proper access handling. |
| Can you do inquiries about vehicles not been owned by same customer? | Vehicle inquiry services can be performed for vehicles that are owned or not owned by the same customer.                                                                                                                                   |
| Service Pricing                                                      | Please refer to the link <a href="https://tamm.sa/public/landing/transactions-fee">https://tamm.sa/public/landing/transactions-fee</a>                                                                                                     |
